DETAILED ACTION

Response to Amendment

1. Applicant's amendments and accompanying remarks filed 12/29/03 have been entered and carefully considered. Applicant's amendment is not found to patently distinguish the claims over the prior art and Applicant's arguments are not found persuasive of patentability for reasons set forth herein below.

Claim Rejections - 35 USC § 103

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Claims 25-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stein et al (6287407B1) in view of Brooks et al (3683921), as set forth in the previous action.

Applicant argues that Stein fails to teach fibers of the different nonwoven layers intermingled with one another. Applicant argues that Stein teaches away from this limitation because Stein teaches pushing fibers of one layer completely through to the other side of the laminate.

Applicant claims only require that a portion of the fiber elements are intermingled with one another. Stein teaches his limitation (fig. 1). In order to push fibers from one layer through the laminate to another layer, a portion of those fibers must intermingle with the fibers of the adjacent layer.

Conclusion

4. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
